IP Camera User's Manual

REV. 2.0

* The IP camera is a specification embedded in the CURADLE PRO PLUS 160 (PX-ICU160C) model.
The IP camera model provided may be changed without prior notice to improve performance.

* If you want to use the IP camera, wireless internet (WiFi) must be installed in the space where the machine is installed.

- **Before Use**

- Your router supports the 2.4GHz frequency band (802.11 b/g/n).
- Your router DHCP is enabled.
- Your smartphone is connected to the Internet with a WLAN/Wi-Fi that the camera will connect with.
- You know the WLAN/Wi-Fi password.(No special characters in the password and Wi-Fi SSID such as @#$%"&*).
- Search"Sricam"on Google Play or iOS App Store / Scan the QR code to download the"Sricam" App.

* If you want to connect your IP camera to a different Wi-Fi than the Wi-Fi you have entered, please delete the device from the application and reset and setting the camera.

• **How to reset IP camera**
  (Unlock the upper surface maintenance part)

If you want to return the setting value, etc. to the factory condition, you can reset it in the machine maintenance part.

Press the power button to turn off the power and disconnect the power cord from the outlet.

A Be sure to disconnect the power cord of the machine from the power outlet.

Turn both locking levers on the top side of the machine by 90 degrees using the rear side of the wrench included in the product. The maintenance part is unlocked.

Locked

Unlocked
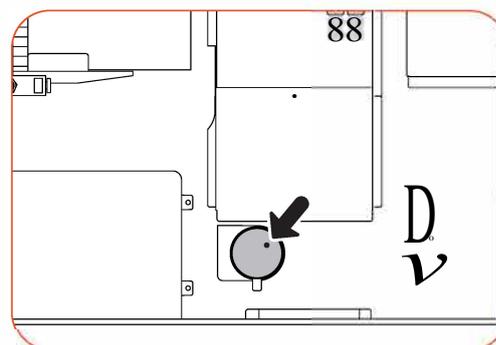

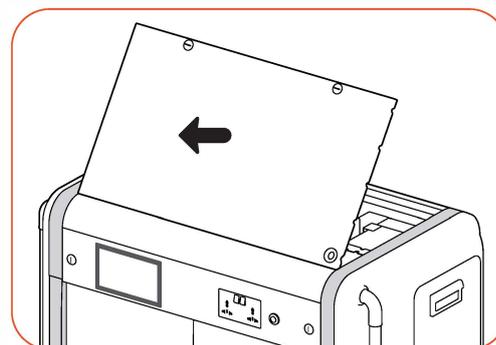

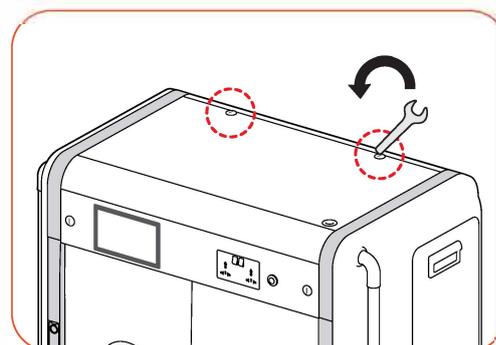

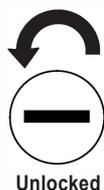

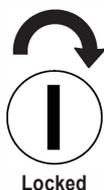

You can reset the IP camera after lifting the top cover to remove it.

When you look at the maintenance part from the top, the part shown in the upper left, figure is the IP camera. Press the reset button for 3 to 5 seconds using a pointed object such as a ballpoint pen in the reset groove on the back of the camera. If you hear a beep, the reset is complete.

When replacement is complete, reassemble in the reverse order of removal.
